Preamble:

Sociology is the study of social life, of group interaction and social behaviour. Since earliest time philosophers, administrators and social scientists have been trying to understand social life. In this attempt there arose social sciences like economics, anthropology, psychology and political science. However, all these sciences do not give us a complete picture of society or of man's social life. Therefore, the discipline of sociology was designed and developed to achieve this end. Thus sociology is a synthesizing discipline trying to unify the results of separate disciplines with a definite purpose, at the same time it is also an analytic and specialized science with its own field of research. Sociology essentially deals with the network of social relationships in society.

General Objectives of the Programme:

1. To introduce the students to the basic concepts and processes in sociology to understand the social life.
2. To equip the students with updated sociological knowledge pertaining to various subfields within the discipline of sociology.
3. To orient the students for comprehending sociological perspectives.
4. To analyze and critically assess the social reality.
5. Prepare students for various competitive examinations.
6. To inculcate the research aptitude and relevant skills in the students useful for their professional life.
7. To prepare the students for undertaking research, jobs in Colleges/Universities/ Research Institutions, various Government Departments and Non-governmental organizations.
8. To prepare the students for undertaking income earning jobs in organizations and agencies.
9. Continuous education in various special fields of Sociology.
10. Need based curricula and teaching to develop aptitude and skills.
